Impact of 3D in your Practice

3D CBCT from Dentsply Sirona offers clinicians and specialists numerous options for diagnosis, treatment plans, patient consultation—all with a seamless, efficient workflow. This is one way you can expand your range of services and treat more patients at your practice. With Dentsply Sirona 3D, patients understand and accept treatment recommendations more readily, improving their overall experience. Dentsply Sirona 3D allows a broadened range of procedures for your practice, from placing implants faster and with confidence to providing endo, TMD and sleep apnea solutions.

3D Imaging Solution

DIAGNOSIS

37% incidental finds are observed with the use of cone beam in the practice.

ENDODONTICS

62% of the time endo treatment plans were altered with aid of 3D.

With 3D, you can see and measure canal shape and length, and identify and visualize the number of canals more clearly.

IMPLANTS

Invest in Implants. In only 3 visits:

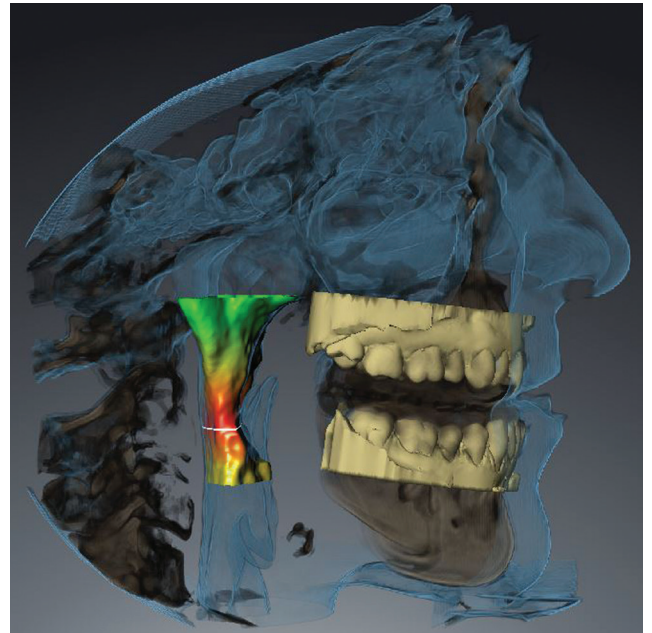

- From consult to final restoration, place and restore implants in as few as **3 visits** using guided surgery and digital restoration. **Reduce patient visits by up to 50%** with traditional implant placement.
- Place and restore 2 implants per month and increase your revenue by **\$84K per year**.

AIRWAY MANAGEMENT

Obstructive Sleep Apnea and Airway Management

- 25% suffer from obstructive sleep apnea (OSA)**, and the incidence rate is increasing by 7 million new cases each year...and **85%** are NOT diagnosed or treated.
- 70% of patients** with OSA can be treated with oral appliance therapy. Only dental practitioners can deliver oral appliance therapy.
- The Simple Sleep Solution provides the exact position of the mandible, thereby reducing appointments and increasing compliance.
- Deliver 2 custom-fitted oral appliances per month and increase your revenue by **\$86K per year**.
