

Composi-Tight® 3D Fusion™

Sectional Matrix System

When **design** and **function** come together... you get **FUSION!**

Tight contacts – guaranteed!

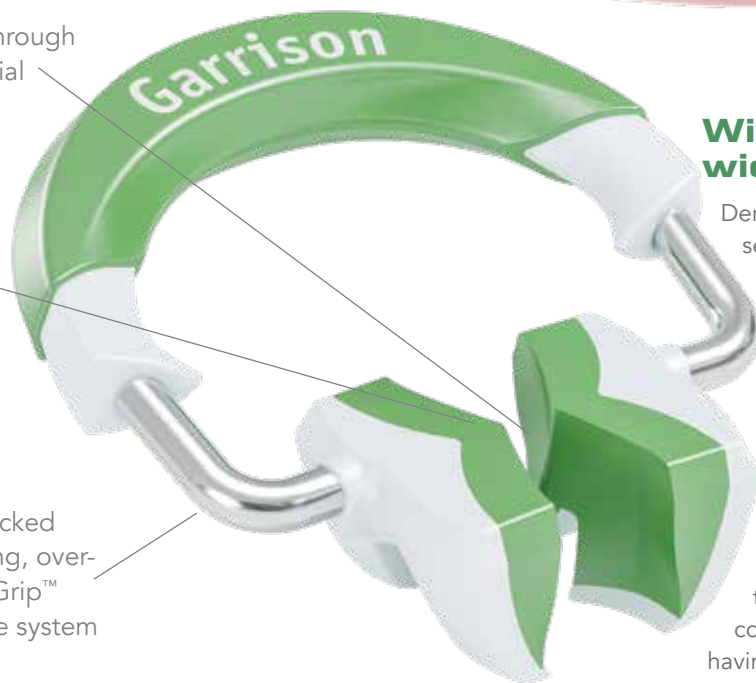

Superior tooth separation force through advanced engineering and material selection guarantees perfect contacts every time.

Ideal anatomy!

Soft-Face™ silicone ring tips with enhanced marginal ridge anatomy hug the pre-contoured dead-soft matrices to the tooth for flash free, perfectly contoured restorations.

Simplified technique!

Composi-Tight® 3D Fusion™ is packed with features like easy ring stacking, over-the-wedge placement and Ultra-Grip™ anti-ring slip extensions that make system use intuitive and frustration free.

Wider indications, wider smiles!

Dentistry's first Wide Preparation separator ring (green) makes Composi-Tight® 3D Fusion™ the most versatile and user-friendly sectional matrix system available. The Wide Prep ring greatly simplifies what until now has been one of the most challenging posterior composite restorations. Now you can restore these big preps with confidence knowing that you will achieve excellent contact and contour without having to take extra steps.

Only a sectional matrix can deliver results like this!

Tofflemire-style System

- ❌ Fails to restore proximal anatomy
- ❌ Thin contact at the marginal ridge
- ❌ Large food trap below
- ❌ Increased likelihood of fracture, occlusal interference, recurrent caries and periodontal disease

Composi-Tight® 3D Fusion™ Sectional Matrix System

- ✅ Operator-friendly retaining system
- ✅ Naturally contoured bands
- ✅ Anatomically correct contacts
- ✅ Contacts at the height of contour
- ✅ Rings produce optimal tooth separation for excellent, tight contacts
