

The Modento Difference

We know there are a lot of options for patient engagement. What makes us any different?

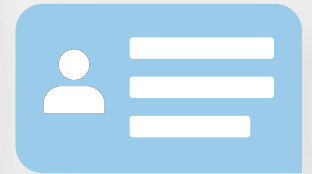

Fully Integrated Forms

Smart paperless forms and consents that send automatically and save a PDF straight to your patient's chart. No more scanning, no more data entry, and no more toggling back and forth between programs. Modento is a one-stop shop for your patient intake and communication.

Bring Your Own VoIP

Modento can integrate with most VoIP providers that offer simultaneous calling. Our screen pops put your patient information right at your fingertips when the phone rings, so you can stop fumbling with search and focus on building patient relationships.

Next-Level Customer Service

Our platform is great, but the best part of Modento is our people. Our Customer Support team boasts a 5-star satisfaction rating amongst our users and has an average response time under 5 minutes for Live Chat. We give you real help from real people in real time – really!

No Long-Term Commitments

Modento contracts are month-to-month and you can modify your package at any time. We don't rely on long-term contracts to keep people invested – we work hard to provide valuable ROI and earn your business month after month.
