

## EDUCATING THE NEXT GENERATION OF ORAL HEALTH LEADERS

The University of Louisville School of Dentistry (ULSD) has earned a reputation as one of the most respected dental schools in the country. The school excels in offering hands-on, high-tech, community-focused experiences that develop tomorrow's leaders in oral health care while addressing issues of oral health equity and access.

### 1 HANDS-ON EDUCATION

In a typical year, there are more than 50,000 patient visits in clinics at the UofL School of Dentistry. In addition, ULSD has opened clinical sites across the state where students go into communities to provide care — including three clinical sites opened in 2021 alone. Those sites provide access to oral health care for patients who have high need, while giving students opportunities to treat more diverse and complex cases than ever before.

**A ULSD degree is held in high regard because students are prepared, both clinically and academically, to be tomorrow's oral health care leaders.**

### 2 TOP-NOTCH TECHNOLOGY

ULSD is poised to become a premier center for training the next generation of dentists in the use of digital technologies that transform patient care and increase practice efficiency. Focus areas include digital imaging (especially intraoral scanning and cone beam CT), 3D virtual printing, digital restoration design, and digital implant planning. These systems are connected through a custom-designed, web-based 3D digital data system.

### 3 RESEARCH POWERHOUSE

ULSD has top researchers in areas including craniofacial developmental biology, microbiology/immunology, pharmacology/toxicology, maxillofacial radiology, and dental materials.

## QUICK FACTS

### FOUNDED

1887

### ACCREDITED PROGRAMS

- Dental Hygiene (BS)
- Dentistry (DMD)
- Oral Biology (MSOB)
- Advanced Education (C, MSD)
  - General Practice
  - Oral & Maxillofacial Surgery
  - Endodontics
  - Orthodontics
  - Pediatric Dentistry
  - Periodontics
  - Prosthodontics
