# INTRODUCING THE BRASSELER USA Preparation-To-Polish Restorative System

# DIGITAL X-RAY SENSORS

You know when something is *just right*

- ▶ **PATIENT COMFORT**  
Clipped corners provide a gentler fit
- ▶ **DURABILITY**  
Durable enough to handle all your operatory activities
- ▶ **IMAGE CLARITY**  
Technology designed to produce crystal clear images
- ▶ **PLUG & PLAY**  
Hands-off integration with most practice management platforms

### GEM™ Sensor Kit

- 1 GEM Digital X-Ray Sensor
- 100 GEM Sensor Barriers
- 1 Positioning System

Retail: \$6,995.00

(Sensors shown at actual size)

## DualForce™ Matrix System Complete Kit 209022-B

Retail: \$571.99

**Special: \$428.99**

1	Premolar Ring	20	#1 Active-Wedges
1	Molar Ring	20	#2 Active-Wedges
25	Ultra-Wrap Matrix Bands, 4.5mm	20	#3 Active-Wedges
25	Ultra-Wrap Matrix Bands, 5.5mm	20	#4 Active-Wedges
25	Ultra-Wrap Matrix Bands, 6.5mm	20	#5 Active-Wedges
1	Band Punch Pliers		
1	Ring Forceps		

## G5™ All-Purpose Desensitizer

- Eliminates post-operative sensitivity in posterior composite restorations
- Works by coagulating plasma proteins within dentinal tubule fluid, which helps eliminate movement of the fluid—the root cause of dentinal sensitivity
- Used after Max Etch and before MPa Max adhesive

### 5mL Bottle 226105-B

Retail: \$88.99 ea.

**Buy 2 5mL Bottles of Desensitizer, Get 1 5mL Bottle at No Additional Cost!**

# ESR™ CM RECIPROCATING FILES

ESR CM utilizes the latest NiTi technology to provide clinicians with superior safety, efficiency and performance. ESR CM files are also designed to preserve more coronal tooth structure compared to WaveOne® Gold.

## ESR™ CM TECHNIQUE

1. After straight line access, determine working length (WL) with a size #10 K-file.
2. Use the ESR CM #25 primary/gauging file to estimate the canal size by engaging in three light strokes.
  - a. If the file reaches the apex easily the canal is “Basic” (larger) and you should finish with the Large ESR CM #40 or Extra-Large ESR CM #50 file.
  - b. If the ESR CM #25 does not reach the apex after two series of three light strokes the canal is “Advanced” (tighter) and you need to use a #15 K-file or the ESR CM Scout file to reestablish a safe glidepath to WL. Next, finish with an ESR CM #30 (which actually has a smaller max diameter than the #25). For extremely tight canals consider finishing with the Small ESR CM #20.
3. Obturate with BC Sealer™ and the matching BC Points™ for the last file used to reach WL.

ESR CM files are provided in sterile blister packs for optimal convenience and safety. If sterility is compromised prior to treatment, the files can be sterilized without any loss of functionality or performance.

*\*15C scout file uses a different austenite metallurgy, making it more robust in tight/curved canals.*

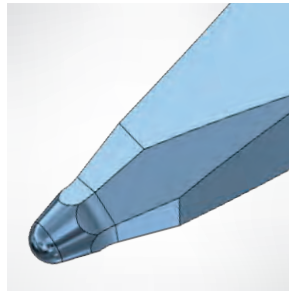

# NEW! XP-3D SHAPER+

Brasseler USA's next generation adaptive file designed to streamline your procedures and give you greater control and safety. With a new, improved ShaperTip, this file allows for more efficient navigation, making it easier to guide around curves and keeping it centered in the canal.

ORIGINAL XP-3D BOOSTER TIP  
3 Facets

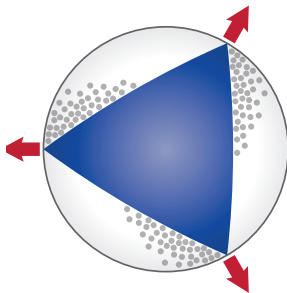

XP-3D SHAPER+ IMPROVED TIP  
6 Facets

The XP-3D Shaper+ features Adaptive Core Technology, which enables the central core of the file to move freely and adapt to the natural morphology of the canal. This helps with debris removal, making the process more efficient without occluding dental tubules. Additionally, the turbulence generated by the XP-3D Shaper+ enhances the penetration of irrigants into the dentinal tubules, improving overall disinfection of the canal.

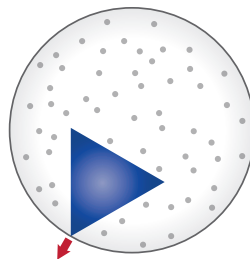

TRADITIONAL  
CORE FILES

Debris Accumulation/Compaction

XP-3D SHAPER+  
ADAPTIVE CORE

Free-Floating with Turbulence

● Debris  
● Stress applied to the canal wall

Using the XP-3D Shaper+ can help reduce debris accumulation and compaction, while also reducing the stress applied to the canal wall. This innovative file transitions from ISO #15 to ISO #30, allowing for shorter procedure times and greater agility.

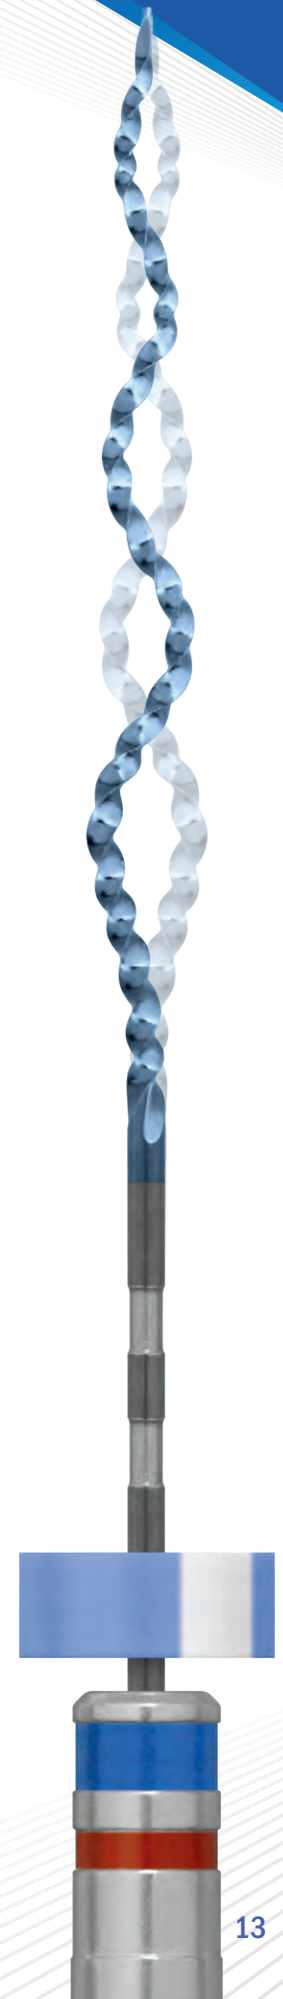

Experience the new design of the XP-3D Shaper+, which offers greater predictability, simplicity, and control. Discover the benefits of the next generation adaptive file, and take your procedures to the next level.

# TRITON<sup>®</sup>

## ALL-IN-ONE IRRIGATION SOLUTION

Unlike traditional irrigants or other advanced 2:1 solutions, Triton works differently by avoiding the use of EDTA and CHX altogether. The non-NaOCl components in Triton proactively dissolve the dentinal debris allowing for a lower concentration of NaOCl to be exposed to organic debris without as much buffering. Synergistic and simultaneous dissolution of organic and inorganic debris permits the clinician to use lower volumes of irrigation solution and ensure maximum clinical efficiency.

### TRITON VS. TRADITIONAL IRRIGATION

- ✓ Multi-functional single irrigation solution reduces chair time, procedural steps, and overall irrigation costs
- ✓ Simultaneous organic and inorganic debris removal
- ✓ Patent-pending composition allows for a lower concentration of NaOCl to be used while providing improved efficacy
- ✓ More effective at smear layer removal vs. NaOCl with EDTA
- ✓ Dissolves organic tissue up to 1.7x faster than traditional NaOCl

### COST-EFFECTIVE

Not only will Triton reduce chair time by eliminating the need for multiple irrigation solutions and sterile water rinses, but it also reduces the number of single-use disposable syringes and tips you'll require. In some cases, Triton can cut your total irrigation cost per procedure in half.

Retail: \$199.95  
**Special: \$149.97**

## BC SEALER™ IS TURNING 15!

15 years of clinical success,  
and there's so much  
to celebrate!

**EndoSequence™ BC Sealer™**

# TotalVac™ IRRIGATION SYSTEM

TotalVac addresses the negative and positive pressure suction and irrigation needs of clinicians performing root canal therapy procedures. The design allows for single-handed positive pressure irrigation with simultaneous suction. The TotalVac kit can be configured to perform both positive and negative pressure irrigation using the included tips, which vary in length and diameter.

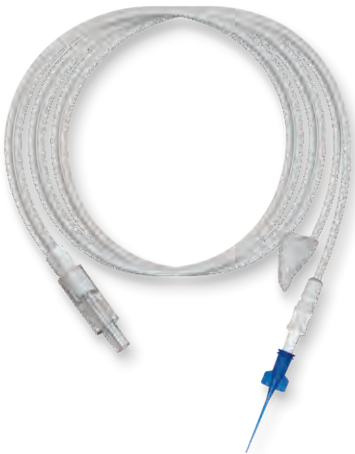

TotalVac is a highly modular system which allows versatility and access to a multitude of needles of different lengths and diameters, based on your specific needs.

## TotalVac™ Kit

- 25 High Volume Evacuation and Surgical Suction Adaptor
- 25 TotalVac Tubing
- 25 Plastic Suction Tip
- 25 25 Gauge Short Delivery Tip
- 25 30 Gauge Side Vented Long Delivery Tip

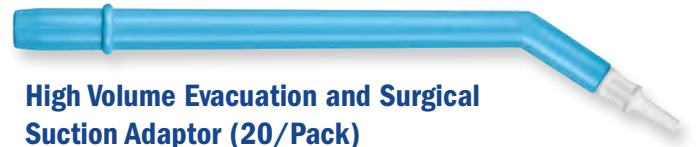

Retail: \$200.00

Invoice or statement prices may reflect or be subjected to a bundled discount or rebate pursuant to purchase offer, promotion, or discount program. You must fully and accurately report to Medicare, Medicaid, Tricare and/or any other federal or State program, upon request by such program, the discounted price(s) or net price(s) for each invoiced item, after giving effect to any applicable discounts or rebates, which price(s) may differ from the extended prices set forth on your invoice. Accordingly, you should retain your invoice and all relevant information for your records. It is your responsibility to review any agreements or other documents, including offers or promotions, applicable to the invoiced products/prices to determine if your purchase(s) are subject to a bundled discount or rebate. Any such discounts must be calculated pursuant to the terms of the applicable purchase offer, promotion, or discount program. Participation in a promotional discount program is only permissible in accordance with discount program rules. By participation in such program, you agree that, to your knowledge, your practice complies with the discount program requirements.
